# Report of the Board of Health.

---

The State Board of Health in its last quarterly bulletin gives a very full report of food stuffs, examined at the State laboratory, and we wish every householder could read it carefully, that they might be the better prepared to go into the market and purchase goods, good and true to name and not adulterated, perishable food especially; and here we refer especially to oysters, that are filled with preservatives to that extent that we find a dropping off in the consumption of an article of diet eaten and esteemed by us all as one of our most nutritious foods. (Any citizen can have a copy of this bulletin for the asking.)

While we think it is all right to build and furnish the best, or one of the best tramp houses in the county for Knights of the Road, we also believe the health of our people, especially the little ones, demand equally as fair treatment; so call upon the proper authorities to open up the ditches through C. A. Kimball's field into which empties sink drains, water closets, and all surface water from Main and a part of Church streets; and here again, we desire to state that while so far no disease has been traced to the ditch or brook running thro' the village, still with everything emptied into it we cannot see why we may not have trouble at any time, and so still believe it should be tiled to the river, or covered where it is. While the quality of our water supply has been, we believe, improved the past year, still complaints are being constantly made that the hydrants are not opened as often as they should be to clean out the pipes, and in winter to make sure they are not frozen and so rendered useless in case of fire.

E. M. TUCKER. Secretary.
